

Real-Time Multilingual Communication. Built to Scale.

Break Language Barriers. Not Momentum.

Reaching a multilingual audience can be challenging. Language barriers limit understanding and participation — and interpreter scheduling adds cost and complexity.

Sorenson Forum removes these barriers with AI-powered translation, real-time captions, and transcripts in 45+ languages — no interpreters or added infrastructure needed.

Whether you're training a global team, hosting a public forum, or leading a multilingual classroom, Forum helps more people understand, engage, and contribute — no matter what language they speak.

Simple to Use. Easy to Scale. Built for Speed.

Forum eliminates the setup and scheduling burdens of traditional interpretation.

There's no software to install, no interpreters to coordinate, and no special hardware required. Participants join from their own devices — via mobile browser, QR code, or optional app.

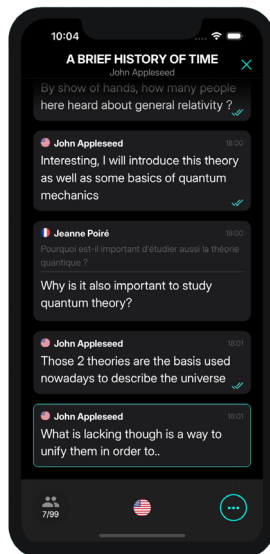

With affordable pricing and 24/7 availability, Forum delivers high-quality multilingual access at the speed your work demands.

Try It for Yourself

Experience what happens when language is no longer a barrier.

Try Sorenson Forum free for 30 days and see how real-time AI-powered translation can help your organization communicate more clearly.

How It Works

- ✓ Set up your session and share a QR code or PIN
- ✓ Attendees join instantly via browser or mobile app
- ✓ Speakers present in their preferred language
- ✓ Forum delivers real-time translation, captions, and transcripts to every participant
- ✓ Built-in glossaries boost accuracy for industry-specific terms

What You Get with Forum

- ✓ **Real-time speech translation in 45+ languages** — so everyone can follow along
- ✓ **Simultaneous captions and transcripts** — for greater accessibility, including support for Deaf and Hard-of-Hearing individuals*
- ✓ **No downloads or installs** — join instantly via mobile browser and QR code, or the optional mobile app
- ✓ **Always on, 24/7** — no scheduling delays or interpreter constraints

* Forum is built for scenarios where speed, scale, and simplicity matter. It's not a substitute for certified interpreters in all cases. Organizations should assess each use case to choose the right language access solution.
